

## XLP-6 LOW PROFILE CAR CARRIER

### Performance Without Compromise

The XLP-6 series of low profile carriers is designed to meet the demands of today's towers. By offering greater stability for carrying loads of all sizes and better ground level access to secure those loads, the XLP-6 builds on the innovation that has made Jerr-Dan technology the most copied over the last 20 years.

Utilizing the original, and now more refined dual angle bed design, the XLP-6 offers the lowest load angle in the industry at 7.4 degrees.\* The aluminum blade raised rails enhance appearance while providing an additional 4" of deck width to handle wider loads. All this, in addition to being the lowest maintenance and most environmentally-friendly carrier built in the world, makes the XLP-6 the only choice for the towing professional.

Jerr-Dan XLP-6: The original and clear choice for performance without compromise.

### Benefits

- The low profile deck allows for fast and easy hook-ups and eliminates the need for the operator to leave ground level when making vehicle attachments
- No modifications needed for installation, avoiding potentially costly future repairs due to non-original equipment manufacturing (OEM) chassis modifications sometimes required by competitive carrier manufacturers
- Environmentally-friendly No-Lube™ Technology leaves a low carbon footprint
- Highest strength-to-weight ratio in the industry
- 3-year warranty increases customer's return on their investment over units with shorter term warranties

\*Minimum load angle achieved with dual angle deck on air-ride chassis with airbags deflated. Some equipment shown may be optional.

## Standard Features

- Lowest load angle in the industry— as low as 7.4 degrees
- Lowest maintenance carrier in the world, including No-Lube™ Technology for slide pads and pivot joints
- Strongest aluminum beds in the industry featuring exclusive and patented Galvanized Steel Beam Technology—Available in Dual Angle design
- On-board hydraulic pressure gauge allows for system diagnostics, potentially avoiding costly dealer service
- 21' and 22' deck length
- 102" deck width
- 12,000 lb deck capacity
- Full complement of steel and aluminum beds with various removable and fixed rail options
- Diamond steel decking
- Extruded aluminum decking with galvanized steel main deck beams
- 8,000 lb high speed worm gear winch with 3/8" x 56' wire rope with swivel hook
- Combination winch cable guide roller/tensioner plate
- Dual control stations
- Full-height steel headboard
- Most advanced, highest performance hose and wire cable tracking system in the industry

## Optional Equipment

- Available with the strongest and most user-friendly Side Recovery System in the industry (SRS-8 or SRS-10)
- Dual Angle "Shark" decks
- 3,500 lb capacity wheel-lift
- Air winch free-spool release
- Wireless remote
- 10,000 lb winch in lieu of 8,000 lb
- Polished aluminum angle removable rails
- Emergency lighting
- Work lights
- Air, E-Hydra, Lectra Shift or Clutch Shift Power Take Off (PTO)
- 36", 48", 60" and 78" toolboxes and storage trays
- Stationary headboard

For a complete list of optional equipment, contact your local Jerr-Dan distributor.

***With a low load angle, you've got the clearance you need to handle the most difficult towing jobs.***
